CargoMind AI

Read any waybill. Price it fairly. Predict delivery. Catch fraud early.

AI logistics intelligence for Indian road freight, in your own language, by voice.

3.5 M	12.5 M	~75%	USD 153.9 B
truck operators	trucks	owned by operators with <5 trucks	road freight market, 2025

The problem

Indian road freight still runs on handwritten, multi-script paper bilties re-typed by clerks. Prices are agreed by phone, delivery times are guessed, and weight or billing fraud is found only at the destination. App-first tools leave out drivers and small operators who prefer to speak in Hindi, Marathi or other regional languages.

Manual entry
Hours of re-typing and costly errors

Guesswork pricing
Under- or over-pricing on unfamiliar lanes

Late fraud discovery
Mis-declared weight found at delivery

"Where is my truck?"
Constant calls for status and ETA

Our solution

Waybill digitisation
Photo of a handwritten or printed bilty becomes structured data with a confidence score per field. Only doubtful fields need a human check.

Fair price band
P10 / P50 / P90 price from lane rates, diesel, season, tolls and demand, with a cost floor and contract caps.

ETA and delay risk
Arrival window and the probability of missing the promised time, using live traffic and weather.

Cross-model fraud check
Weight, price and ETA mismatches are flagged at the booking counter, with the reasons shown to the reviewer.

Voice agent
Call or send a voice note in Hindi, Marathi, Gujarati or Tamil. Every number spoken comes from a verified system output.

Learns from you
Every operator correction and review decision retrains the models, so accuracy improves with use.

Why CargoMind AI is different

Our models share one consignment representation and **audit one another**: a quote far below the predicted price, or a document weight that disagrees with the declared weight, becomes a fraud signal. Competing tools handle only parts of this workflow. The design is the subject of a patent application in preparation, and our dataset of corrected multi-script bilties grows with every use.

How it works

1. Capture
Photograph the bilty or send it on WhatsApp.

2. Verify
AI reads the fields; the operator confirms only uncertain ones.

3. Quote
Price band and arrival window with delay risk.

4. Check
Fraud score: proceed, flag or hold before dispatch.

Example: a bilty shows 6.2 tonnes but the booking says 4 tonnes, and the quote is 30% below the predicted price. CargoMind AI flags it at the booking counter, before the truck leaves, instead of after delivery.

Plans (per month, excluding 18% GST)

Lite	Starter	Pro	Enterprise / API
Free Scanning, up to 30 waybills Single agents	**Rs 999** Scanning, price band, ETA One office	**Rs 2,999 per branch** 500 waybills, 300 voice min, fraud detection, multi-branch Growing fleets	**Rs 15,000** API access, high volume, support 3PLs, shippers, TMS

Prices are proposed and will be validated in pilots.

Who it is for

Small and medium fleet owners (1–50 trucks), booking agents and brokers in transport hubs, MSME shippers, and the drivers who work with them. Our first market is the Mumbai–Bhiwandi–Pune–Nashik corridor, followed by Nagpur, Gujarat, Delhi-NCR and Tamil Nadu.

Our roadmap

Months 1–3
Free pilot with 10–20 transporters; waybill digitisation

Months 4–6
Paid launch of Starter and Pro; field sales

Months 7–9
Price bands, ETA and delay-risk alerts

Months 10–12
Voice agent in Hindi and Marathi; fraud detection

Team

Gyana Karn
Founder & Director, Product & Technology. S.P.I.T. MCA. Builds the AI and software; author of the Billkaat cargo billing prototype.

Jitendra Karn
Co-founder & Director, Operations & Business. S.P.I.T. MCA. Leads pilots and transporter relationships; family cargo business access.
